BE AI-ENABLED IN WEEKS

ARTIFICIAL INTELLIGENCE FOR ACTUAL PROBLEMS

Write a contract in 5 minutes. Translate multiple languages in seconds. Process and format thousands of handwritten documents, while you sleep. Launch projects that deliver ROI by next quarter.

DATA

ARTIFICIAL INTELLIGENCE

CLOUD

WHY US?

We approach data, cloud, and AI holistically to design tools that are built right the first time. We start with small, scalable projects that can be rolled out quickly and safely, with measurable outcomes.
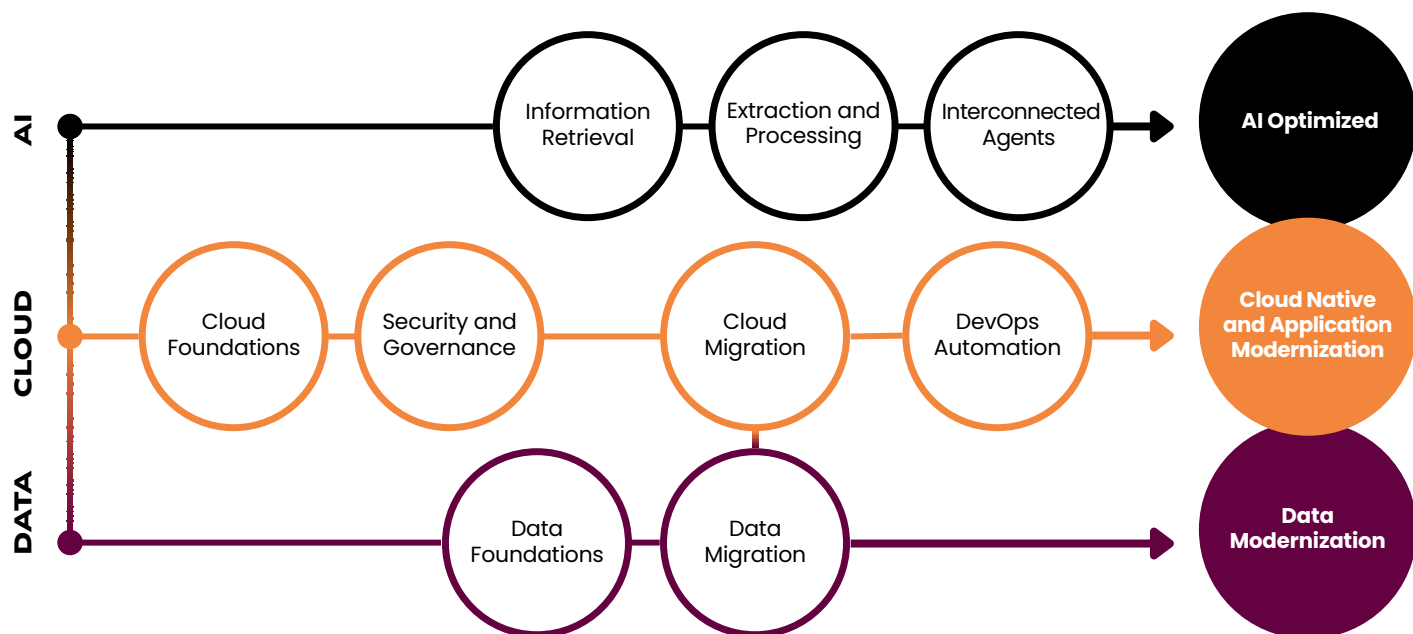

HOW WE TAKE COMPANIES FROM IDEA TO AI-DRIVEN

We use AI to solve real-world problems. Many of our capabilities can be launched in 6-8 weeks. First, we work together to isolate a pain point. The goal is to have the highest impact with the smallest investment. Then, we right-size the AI toolset to deliver with visible outcomes and speed.

FUNCTIONS

IT | HR | Legal | R & D | Finance | Accounting | Planning

INDUSTRIES

- Financial Services
- Manufacturing
- State & Local Government

AI

Information Retrieval → Extraction and Processing → Interconnected Agents → **AI Optimized**

CLOUD

Cloud Foundations → Security and Governance → Cloud Migration → DevOps Automation → **Cloud Native and Application Modernization**

DATA

Data Foundations → Data Migration → **Data Modernization**

● **AI**

Information Retrieval
Customer Service Chat + Voice
Employee Knowledge Bot
Organizational Discovery

Extraction and Processing
Document Processing
Image Processing + Analysis
Data Extraction + Transformation

Interconnected Agents
Workflow Automation
Customer Personalization

● **CLOUD**

Cloud Foundations
Landing Zone Setup
Well-Architected Framework
Strategic Foundation

Security and Governance
Security Frameworks + Compliance
Governance Structures + Policies
Risk Management Protocols

DevOps Automation
Automated Deployment + Monitoring
Continuous Integration
Continuous Deployment
Infrastructure As Code

● **DATA**

Data Foundations
Data-Specific Landing Zones
Well-Architected Framework
Data Strategy Alignment
Cloud Strategy

●● *Simultaneous*

Data + Cloud Migration
Application Discovery + Assessment
Migration Planning
Wave Scheduling
Application + Database Migration
Hybrid Connectivity
Downtime Minimization
