READY FOR AI: GETTING STARTED

ARE YOU READY TO LEVERAGE THE POWER OF AI?

11:59's team of experienced business and digital transformation experts can help you navigate the complexities of AI adoption. We work with you to develop a tailored strategy that aligns with your goals and ensures a smooth transition. Together, we unlock the potential of AI to drive innovation, improve efficiency, and achieve your organization's objectives.

Conduct an AI Readiness Assessment

A facilitated assessment to generate insights that will define your organization's AI journey. Explore considerations such as:

- Potential value-add opportunities
- Alignment with business goals
- Data quality and data readiness
- Talent and expertise
- Ethical and legal considerations
- Technical foundation
- Change management
- Risk assessment and controls
- Maintenance & longevity

Write an AI Strategy

Leveraging the insights from your organization's readiness assessment, 11:59 creates a tailored AI strategy that includes an implementation roadmap, an upskilling strategy, and expert recommendations on tooling and tech stack.

Implement a Pilot Project

Pilot projects are low risk opportunities to prove use cases for AI in your organization and decrease time to value. Our team conducts a short discovery process to identify, design, and implement pilot projects.
